For increased prevention of urinary tract infection, reduce the use of diapers and eliminate bedsores. It also collects urine, washes and dries the patient automatically.

UCLEAN
Automatic Urine Collector

For increased prevention of urinary tract infection, reduce the use of diapers and eliminate bedsores. It also collects urine, washes and dries the patient automatically.

For technical support on the Uclean, please contact customer service at 888-436-6787 or e-mail sales@carehealthamerica.com.
Personal Automatic Urine Collection System

In an effort to improve care and comfort for bedridden patients, particularly at a time when there are economic pressures on staffing levels, this automatic urine collection system was developed.

There has never been a device like the Uclean 10000, now available for patients. This small device (5 lbs.) can accommodate 1.9 liters of urine which is 0.5L more than the average patient’s one day total urination (~1.45L), with the added benefit of a clean water bidet and a drying function. Uclean 1000 saves labor, time, and costs of caring for patients. It also reduces the possibility of skin rashes, sores, and UTIs (Urinary Tract Infections).

**The following demographics:**

- **Immobilization**
  - Spinal cord injury
  - Paraplegia
  - Quadriplegia
  - Hemiplegia related stroke
  - Motor weakness due to myopathy or neuropathy
  - Chronic disease
  - Training period of urination after Foley Catheter removed
  - Febrile patients caused by indwelling catheter
  - During rehabilitation
  - Frequent voiding (nocturia)

- **Severe Trauma**
  - Preoperative or postoperative state

- **Degenerative Diseases**
  - Parkinson’s
  - Alzheimer’s (Last stage)

- **Cardiovascular Disease**
  - Acute MI
  - Cardiomyopathy
  - Valvular heart disease
  - Subarachnoid hemorrhage
  - Intracranial hemorrhage

- **Limited Activities of Daily Living**
  - Traffic accident
  - Fracture
  - Full term pregnancy
  - Coma
  - Low activity caused by underlying disease
  - Terminal cancer
  - Severe cerebral palsy
  - Pulmonary disease: (COPD, Emphysema, Lung CA)

- **Statistical Analysis**

  The American Geriatric Society and Medica together state that 85% of senior falls costs Medicare, on average $19,440. Patient care cost for falls are more than $8 billion per year and the cost of medical care for patients with balance disorders exceeds $1 billion per year in the United States. One third of American adults, 69 million men and women over age 40, are up to 12 times more likely to have a serious fall because they have some form of inner-ear dysfunction that throws them off balance and makes them dizzy, according to John Hopkins experts. Falls are the most common cause of injuries among senior citizens and the top reason for a hospital admission for trauma—33% of all seniors will fall this year.

- **Used in the following facilities:**
  - Nursing Homes
  - Long-Term Care
  - Hospitals
  - Hospice
  - Home Care
  - Rehabilitation

Effectively works as a “Staff Multiplier” for bedridden patients, or patients that need help to make it to the bathroom safely, can now do so in a sanitary manner without leaving their wheelchair or bedside. Staff can empty the urine collection tank on their own schedule while making their routine rounds.
